## Installation instructions for Cube Design Tilttable cable tray

Step 1: Measure and mark where the brackets need to be mounted. Find the center of the table and measure from this point.

L 1490 mm = measure 757 mm to the first hole. There are 18 mm from first to second hole.

L 1290 mm = measure 657 mm to the first hole. There are 18 mm from first to second hole.

L 1090 mm = measure 557 mm to the first hole. There are 18 mm from first to second hole.

Position the holes 120 mm from the outer edge - this will create 45 mm from the edge of the table and into the cable tray.

Step 2: Place the first bracket according to the markings and secure with the two screws.

Step 3: Slide the cable tray over the first bracket so that it hangs in the bracket.

Step 4: Slide the other bracket into the other side of the cable tray and secure the bracket with two screws (on your marks) while holding the cable tray. Finally, tighten all the screws.

**Finished, enjoy the table and cable tray.**
